

# B2B CYBER SECURE

Builder of secure architectures

*You know your IT security is not where it should be. With our experts, services and technologies, effectively protect them according to your budget and risk tolerance level.*

## Digital security Expertise

*Staffing is becoming increasingly difficult and costly and this makes you worried that you don't have a clear understanding of how secure your digital ecosystem is.*

**> Complement your team's skills with those of our IT security specialists and technicians.**

1. Security audits
2. Inventory of your digital ecosystem
3. Project management to upgrade your digital security architecture
4. Surveillance and fast response contracts

## High Reliability IT Services

*Your infrastructure has become a complex ecosystem with invisible vulnerabilities that make high-impact service interruptions increasingly likely.*

**> Secure your vulnerable systems now and reduce your technology debt by migrating to our managed IT services.**

1. Hyper-convergent computing environments
2. Multi-system managed anti-malware protection
3. Backup systems with automated backups

## Security Technology

*New technologies could reduce your growing vulnerability. You need them now, but the skills and the time to bring them on are in short supply.*

**> Implement the technologies you need with one of Canada's leading IT security VARs.**

1. Equipment and software sales
2. Upgrades and migrations
3. Installation et configuration
4. Training
5. Service contracts

## We know how to take on the 3 dimensions of IT security

### Vulnerability to Cyber Threats and Fraud

*We can make your IT vulnerabilities visible and then help you reduce them to the level of risk you are comfortable with.*

### Infrastructure reliability issues

*The increasing age and complexity of your systems is leading to breakdowns. We help you cost-effectively reduce the frequency of these breakdowns.*

### Low Resilience to system outages

*We help you bounce back faster from major outages, reducing their impact to a manageable level.*

## Our technological partners

We work in partnership with leading IT security vendors
